Claims 1-100 remain pending.

Applicant's election of Group I (claims 1-39, 52, 53, 66, 77, 88, 99) with traverse is acknowledged.

Applicants have argued that if an applicant has asserted a "single general inventive concept", then he or she is "immunized" from restriction. If this were really true, then restriction would never be justified, since it requires little in the way of imagination to come up with a way of using two or three different physical entities, no matter how unrelated they may be from the perspective of the technical expertise required to understand them individually (e.g., peptides, semiconductors, and telecommunications equipment). However, "blanket immunity" does not exist in cases where the claimed invention "fails to define a contribution" over the prior art. At the present time, the examiner merely asserts that this is the case. In the event that he cannot, at any point in the future, provide evidence to support this assertion, however, he will be compelled to concede applicants' position.

Further definition of the elected lipopeptide is now sought. What is required (under 35 U.S.C. §121) is an election of a fully defined lipopeptide that falls within the scope of claim 1 and which is consistent with the previous election (i.e., Th epitope of SEQ ID NO: 1, CTL of SEQ ID NO: 2, and the peptide contains one lipid moiety which is Pam₂Cys).

Art Unit: 1654

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

. . . .

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
